

Collaboration: A Multidisciplinary Approach to Educating Students With Disabilities

This practical resource for teachers, professionals, and parents addresses collaboration, effective communication, and how to work with families. Information also is included on the many different professionals involved in the education of students with disabilities, such as occupational therapists, speech-language pathologists, school psychologists, intervention specialists, and more. Each chapter is written by actual professionals in that area and addresses roles and responsibilities of the authors jobs, how they communicate with teachers and parents, and the direct services they provide to students and teachers. With a focus on how everyone must work together to meet student needs, this is an essential text for special education professionals.
