

Observing Children and Adolescents CD

A supplement for courses in Child and Adolescent Development, Early Childhood Development, and Observation courses. This 3 volume CD set was created to help students see the development of children with whom they work while guiding them through activities that help them develop a discerning eye for the developmental nuances of children's behavior. Topically organized, these CDs can be used to supplement any development text or course, or any educational psychology course where observation and development are a significant focus.
