

## Mystical Theology: The Science of Love

From the earliest centuries there has existed a Christian theology of mysticism, defining the state which Bernard Lonergan called a being in love with God. St. John of the Cross wrote such a theology for the sixteenth century, calling it the science of love. Now, William Johnston, one of the great spiritual writers of our time, attempts to do the same for the twenty-first century. In Part One of *Mystical Theology* Johnston surveys Christian mysticism through the centuries. Johnson shows that such a theology today must dialogue with modern science and with Eastern religions. Part Two provides this dialogue, where Johnston engages Einstein's theories as well as Zen Buddhism. In Part Three, it becomes clear how the science of love is no longer an esoteric discipline for monks and nuns. In Johnston's writing it becomes accessible to all modern people grappling with problems of sexuality, social justice, world peace, and the protection of the environment. *Mystical Theology* is indispensable to all those seeking guidance as well as intellectual and historical foundations of the Christian mystical experience today.
