

Managing Knowledge - The Trousers of Reality: Volume 2

Volume two of the Trousers of Reality explores Neuroscience and shows what can be done to use NLP, Agile and similar methods as an effective framework to transport the breakthroughs of science into daily life, project management and interpersonal communication. It provides many useful links to management theory, philosophy, science and more. We are living through a pivotal point in human social evolution. What has been accepted knowledge about the brain for four hundred years is being reimagined due to the work and courage of some amazing scientists. You do not have to understand the deep mathematics, the complex psychology or the medical terms in order to start working with what these amazing people are telling us. Certainly if you manage or interact with people, particularly people who use their brains for a living, you need to understand the impact this knowledge has. Every area of human existence is being affected by this new knowledge. Everything that every person does will benefit from the understanding that it is bringing.
