

Business Education and Training: A Value-Laden-Process, The Management of Values: Organizational and Educational Issues (Volume 5)

Co-published with the Oxford Philosophy Trust, this volume is part of an ongoing series representing the work of the International Conference on Social Values. The concerns raised in these papers center around the underlying philosophy and the assumptions they make about human nature and the relation of the individual to others and to the state. This collection reflects an ongoing dialogue with values, education, enterprise and the post modern mind.
