The concept of retirement is little understood by today's workers. Everyone seems to want it, but few really know how to go about getting it or how to manage it once they do get it. It is my privilege to call Tom my friend and colleague. I know of no one else so thoroughly committed to the diligent pursuit of truth, in the field of human behavior as it relates to Finance, as Tom McFie. He is a fresh, bright and dynamic voice who first clarifies the issue, then presents clear solutions that are relevant to the wealthy as well as the wage earner. ~ Joe Pantozzi CLI ChFC - Financial Consultant, Founder & CEO of Alpha Omega Wealth

This is valuable information for anyone thinking about the R word retirement. (And, if you aren't, you should be!) The message in Retirement Curveball should be given considerable, serious consideration. ~ Tom Ziglar - CEO, Ziglar Inc. - (son of Zig Ziglar)

Retirement Curveball is a great book. Just as in baseball, the pitcher will throw the hitter a curve ball as a deceptive pitch when the hitter is looking for a fastball coming right down the middle that's how it is in the world of 401(k)s, 403(b)s, IRAs, Social Security, etc. Each of us as the hitter is trusting that the government has our best financial interests in mind for our retirement through these programs, where in reality we are being deceived. The Perpetual Wealth Code is the pitch we want. The tables, graphs and website tools, really help the reader in understanding, planning and taking control of their financial future. Thank you for taking the time to share your insight with each of us. ~ Keith Funkhouser - Rocket Scientist
