

Shining a Light on the Autism Spectrum: Experiences and Aspirations of Adults

Produced in conjunction with Autism Spectrum Australia (Aspect), Australia's largest provider of services with people on the autism spectrum, this new text explores the experiences, needs and aspirations of adults on the spectrum. The volume utilises the structure of a recent survey (the only one of its type in Australia and one of few conducted internationally) and presents data from the study with contributions from adults on the spectrum to illustrate the findings with first person accounts and case studies. By drawing on these unique experiences, this valuable resource is presented in a way that will be both engaging and accessible for a wide range of readers.
