

## The Pet Budgie Died This Morning

This book is the first of a series of short stories written by this new author looking back at some of the funny episodes of his life and looking at present day topics of interest. In this 1st book Alan discusses topics ranging from his early schooldays to holidays, to working with local builders. He takes a rather cynical look at the world of politics before reviewing his failed attempts at DIY. Other topics include a heartfelt complaint about the education system and a painful look back at his only visit to a gym. Booze, pets and gardening are not spared the humorous touch either, and IKEA and Health and Safety take a bashing too. Is it funny? Well that rather depends upon your sense of humour but some people think so.
