At a time when the U.S. education system consistently lags behind its international peers, *Dumbing Down America* shows exactly why America can't keep up by providing a critical look at the nation's schools through the eyes of the children whose minds are languishing in countless classrooms. Filled with specific examples of how gifted children are being shortchanged by a nation that believes smart kids will succeed on their own, *Dumbing Down America* packs a powerful message: If we want our nation to prosper, we must pay attention to its most intelligent youth. With more than 35 years of experience working with and for gifted children, author James R. Delisle provides a template of what can and must happen in America's schools if they are to fulfill their mission of educating every child to the fullest potential. *Dumbing Down America* is a must-read for any individual who believes that the unfulfilled promises to gifted children must begin to be met in America's schools today, not someday.
